Lab 2: Jira hands on – Agile Backlog Creation & Sprint Simulation

Micro-Lending & Peer Credit Risk Assessor

Name: EPARI SUBHRANSI
SRN :PES1UG24CS161

1. Project Overview

The project, Micro-Lending & Peer Credit Risk Assessor, is designed to support a micro-lending platform where borrowers can submit loan requests, credit risk can be assessed, lenders can discover suitable loan listings, and repayments can be scheduled and monitored. Jira was used to organize the project using Epics, User Stories, Story Points, Sprints, and Scrum reports.

2. Project Epics

Epic	Epic Name	Purpose
Epic 1	Borrower Loan Management	Manage borrower loan requests and validation.
Epic 2	Credit Risk Assessment	Assess borrower risk and assign credit risk ratings.
Epic 3	Loan Funding & Repayment	Manage EMI schedules, repayments, and repayment status.
Epic 4	Lender & Default Management	Help lenders discover loans and receive default warnings.

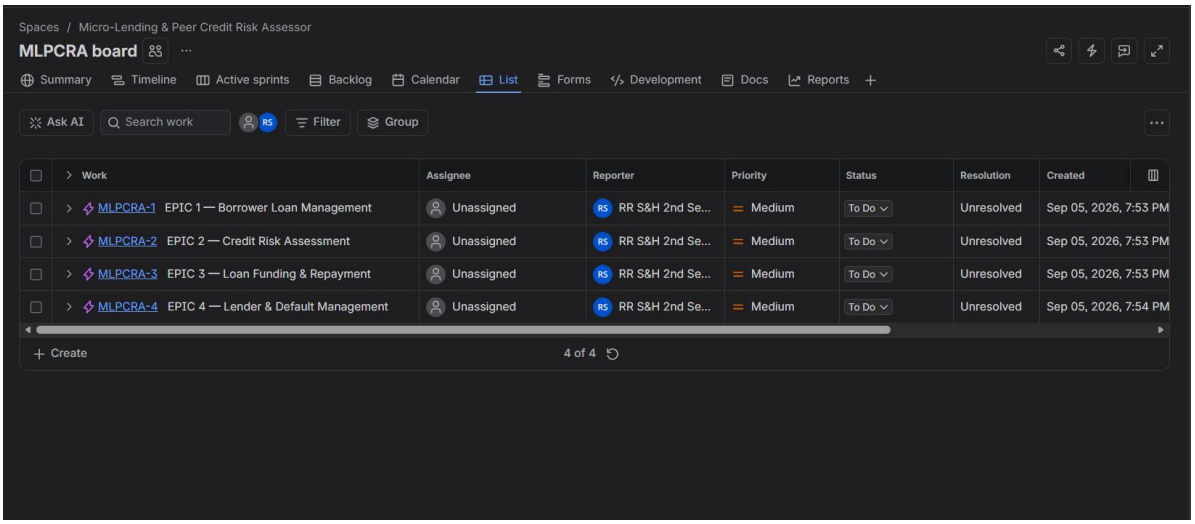

3. User Stories and Story Points

	User Story	Epic	Points
1	Story 1.1: Submit Loan Request	Borrower Loan Management	5
2	Story 1.2: Validate Loan Request Details	Borrower Loan Management	3
3	Story 2.1: Assess Borrower Credit Risk	Credit Risk Assessment	8
4	Story 2.2: Assign Credit Risk Rating	Credit Risk Assessment	5
5	Story 3.1: Generate EMI Repayment Schedule	Loan Funding & Repayment	8
6	Story 3.2: Make EMI Repayment	Loan Funding & Repayment	8
7	Story 3.3: Update Repayment Status	Loan Funding & Repayment	5
8	Story 4.1: Browse Available Loan Listings	Lender & Default Management	3
9	Story 4.2: Filter Loan Listings	Lender & Default Management	5
10	Story 4.3: Trigger Default Warning	Lender & Default Management	5

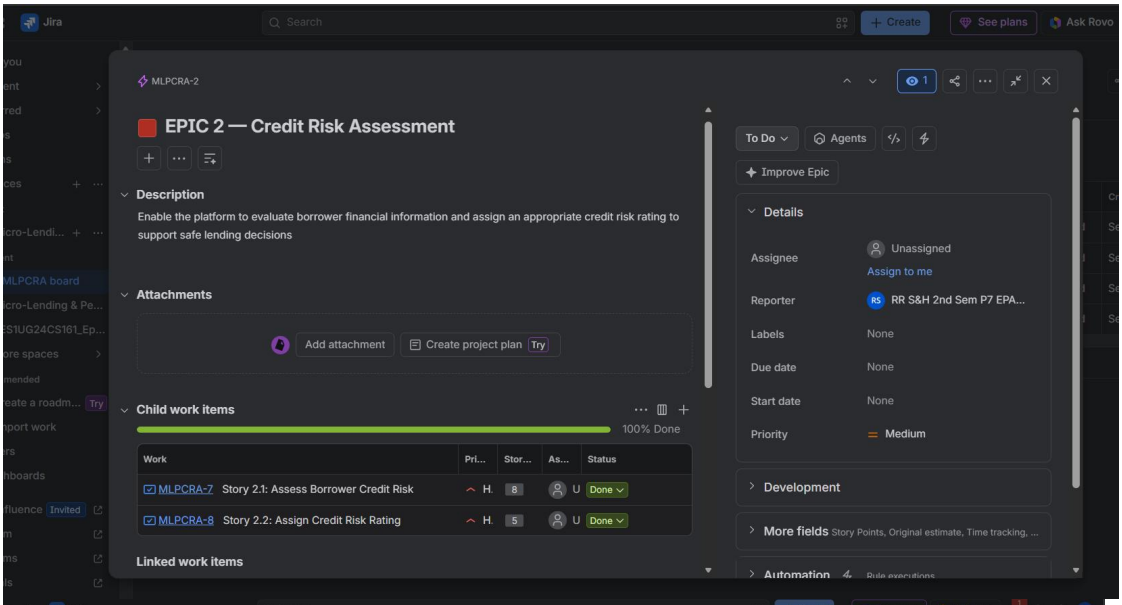

4. Sprint Summary

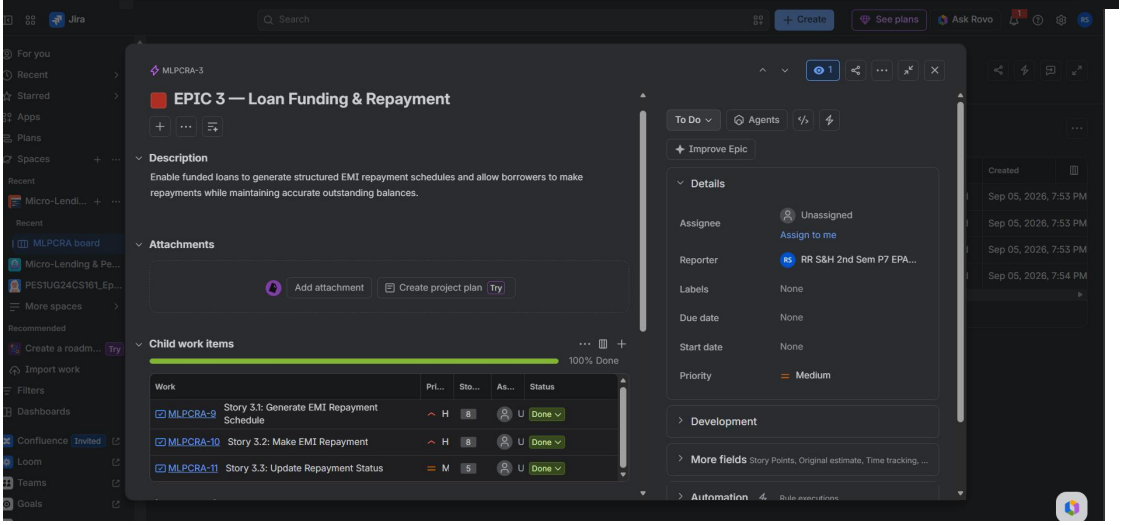

Sprint	Work Covered	Story Points	Status
Sprint 1	Borrower loan submission/validation and credit-risk assessment/rating	29	Completed
Sprint 2	EMI repayment, repayment status, lender listings, filtering and default warnings	26	Completed

Sprint 1:

Sprint 2:

6. Reflection Questions

1. What was the purpose of using Epics and User Stories?

Epics were used to divide the overall project into major functional areas, while User Stories represented smaller, actionable requirements. This made the project easier to organize, estimate, prioritize, and track.

2. Why were Story Points assigned?

Story Points were used to estimate the relative effort and complexity of each User Story rather than estimating only in hours. Larger stories such as credit-risk assessment and EMI scheduling were assigned more points because they involve greater complexity.

3. What was the purpose of Sprint planning?

Sprint planning helped divide the project work into manageable time-boxed iterations. The first sprint focused on the initial borrower and credit-risk functionality, while the second sprint focused on repayment and lender-related functionality.

4. What does the Burndown Chart show?

The Burndown Chart shows how much estimated work remains during a sprint. As User Stories are completed, the remaining Story Points decrease. The chart can be compared with the guideline to understand whether the sprint is progressing at the expected rate.

5. What did you learn from using Jira?

I learned how Scrum concepts can be represented and tracked in a real project-management tool. I practiced creating Epics and User Stories, assigning Story Points, organizing work into Sprints, changing issue status, and interpreting sprint reports such as the Burndown Chart.

6. What challenges were encountered?

One challenge was understanding how Jira records changes to issue status and sprint scope over time. Another was understanding that the Burndown Chart is based on the actual timestamped history of work and therefore depends on when issues are moved between statuses.

7. What could be improved in future sprints?

In future sprints, work should be updated progressively rather than completing all status changes at the same time. Issues should move from To Do to In Progress and then Done as the work actually progresses. This would produce a more realistic Burndown Chart and provide better visibility into the team's progress.
